At Briscoe Solutions, we believe that all of the hard work in IT should happen *before* the software gets into the customer's hands, not after. We also believe that software tools should save time and money.

Vivid Reports, the flagship product of Briscoe Solutions' suite of corporate performance management software, helps CFOs and other decision-makers access and share powerful data quickly. With Vivid Reports, you can spend more time leading and making decisions, and less time assembling and organizing data. Here's why; here's how:

- Vivid Reports is **informed by years of consultation** with finance and IT professionals. Over and over, we've been told to make it familiar and easy to use. We've been listening.
- The **software uses Microsoft Excel®** as a familiar workspace for presentation and analysis.
- Vivid Reports is powered by a proprietary Microsoft SQL Server®-based engine. It takes **only seconds to refresh reports** as you analyze different information.
- You can emerge from a circus of multiple spreadsheets and enjoy **precise control of report definitions and security**.
- Helpful **charts and graphs** help you summarize, analyze, and assess your information.
- You can **drill down to multiple levels** of data to gain in-depth understanding of your organization's financial position.
- You don't need to be a tech expert to use Vivid Reports. Hands-on training by staff from Briscoe Solutions will have you **up and running in hours**. You will not need to rely on your IT department to manage the software.
- **Seamless transitions** from current reporting software to Vivid Reports are a snap.
- Vivid Reports is web-connected. With a VPN, you can gain **access to your data from anywhere**.

"Vivid Reports is simply the most powerful, flexible, and ultimately usable financial reporting tool I have encountered. And despite its power, its Excel base equates to familiarity and ease of use. I recommend it enthusiastically!"

**GORD HILDEBRAND**  
Chief Financial Officer  
Ridley, Inc.

"We are thrilled with both the software and support. Vivid Reports converts and consolidates financials across all of our entities worldwide and provides us with helpful analysis tools."
